Subject
Results of Test Substances

Dear Harley,

Herewith the results (log 10) of the two test substances (Tecmark 355 and 357) used to inactivate ovine *Chlamydia psittaci* and canine parvovirus.

Inactivation time (min)	315 - 78% Tecmark 355 <i>C.psittaci</i> CPV*		Bioxyde Tecmark 357 <i>C.psittaci</i> CPV		Control <i>C.psittaci</i> CPV	
	0	2.32	0	0	3.8	4.82
5	0	0	0	2.8	4.63	
10	0	0	0	<1.62	5.00	
30	0	0	0	0	4.95	
60	0	0	0	0	4.78	5.5

- Toxic effect on cells at 10⁻¹ dilution meant that no result could be given for a 1:10 dilution of virus. However, no virus was observed at the 1:100 dilution (3.3log 10) or above.

Kind regards

Dr W S K Chalmers
